

Data Acquisition

- This demonstration will make use of the following data sets, which has been gathered from Wikipedia:

https://github.com/stillnessdata/Coursera_Capstone/blob/master/KL_disrict.csv

https://github.com/stillnessdata/Coursera_Capstone/blob/master/JB_disrict.csv

- Each of the dataset is including postal code, district, and the area. So, we will be using them for the comparison.
- The Foursquare API will be used in order to explore neighborhoods in both cities and compare them.
